

Farmers Branch Creek Report Week of 7/20/15

July 24, 2015

Summary:

Staff continues to monitor the pump station to ensure it runs consistently. Addison provided well logs for the past two weeks, indicating an average flow of 32,780 gallons per day. Assuming a flow rate of 32gpm, this indicates that they pumped an average of 17 hours per day.

Inspections:

Staff visited Vitruvian Park twice. Both times the well was running and based on visual inspections, there were no issues of note in the reservoirs.

Date	Time	Running?	Initials
7/21/2015	10:38 am	Yes	LM
7/21/2015	1:45 pm	Yes	SD
7/23/2015	12:31 pm	Yes	LM

Well log (via City of Addison):

The most recent well information indicates that between 7/3/15 and 7/17/15, Addison pumped 458,923 gallons.
